SUMMARY

Full-stack developer building and testing .NET 8 / OData REST APIs and Angular 16 features in an Agile, BDD-driven Scrum team. Comfortable across backend (Entity Framework, MS SQL), frontend (Angular, React), automated testing (SpecFlow, Playwright), and Azure cloud. M.S. in CS.

TECHNICAL SKILLS

Languages: C#, Java, Python, JavaScript, TypeScript, SQL, HTML, CSS

Backend: .NET 8, ASP.NET, Entity Framework, OData, REST APIs | **Frontend:** Angular 16, React, Next.js

Testing: SpecFlow (BDD/TDD), Playwright, xUnit | **Cloud / DevOps:** Azure (Cloud Functions, DevOps, App Service), CI/CD pipelines, Docker

Data / Tools: MS SQL Server (incl. Bulk Load) | Git, Visual Studio, VS Code, Postman, Jira, Figma | Agile / Scrum

EXPERIENCE

Full Stack Developer

Aug 2024 – Present

Corteva Agriscience — via Antra Inc. / Insight Global — Johnston, IA (Hybrid)

- Implement and maintain backend REST API endpoints using .NET 8, OData, Entity Framework, and MS SQL Server for an internal data repository application, picking up sprint tickets across new features and bug fixes.
- Build and modify Angular 16 components per sprint requirements, contributing to the team's transition into frontend development.
- Write and run SpecFlow (BDD/TDD) scenarios following established team patterns to validate API behavior before merging.
- Author Playwright end-to-end UI tests and API integration tests for my own sprint stories, in line with the team's policy that developers own test coverage for the tickets they ship.
- Contribute to Azure Cloud Function development and support the team's Azure tenant migration tied to the Corteva corporate split.
- Participate actively in Scrum ceremonies (sprint planning, standups, refinement, retrospectives), collaborating with full-time engineers and the Product Owner to clarify ticket scope and unblock work.

Software Engineer Intern

Jul 2021 – Aug 2021

Swedemom — Remote

- Improved on-site product search performance by tuning SQL queries against the C# / SQL Server backend.

Software Engineer Intern

Apr 2021 – Jul 2021

Relaymile — Remote

- Built and styled new page templates and shipped feature additions on the Relaymile website using React, HTML, and CSS within a Scrum environment.
- Created and updated backend routes and adjusted Python data models alongside full-stack teammates; collaborated via GitHub, Docker, and Postman.

Web Development Intern

Mar 2021 – Jun 2021

Minority Programmers Association — Remote

- Built and restyled pages for the MPA website using React / Next.js as part of a Scrum team, coordinating with UI/UX, QA, and backend developers.

PROJECTS

Jama Connect ↔ Jira Extension — Capstone Project

Jul 2020 – Dec 2020

- Eight-person agile team building a Jama / Jira integration to browse Jama content, create cross-tool links, and sync user-defined fields. Authored user stories with the sponsor, designed UI/UX in Figma, and implemented frontend functionality in React.

EDUCATION

M.S., Computer Science — Portland State University (GPA 3.89)

2021 – 2023

B.S., Computer Science — Portland State Univ. & Changchun Univ. of Technology (2+2 Joint Program)

2015 – 2020
